

# The Coastal Resources Management Program

The University of Rhode Island Coastal Resources Center and United States Agency for International Development Global Center for the Environment Water Team, through the Coastal Resources Management II Cooperative Agreement (CRM II), are working in partnership to...

*increase conservation and sustainable use of coastal resources*

worldwide, with emphasis on assistance to key countries in Asia, Eastern and Southern Africa, and Latin America.

CRM II works towards achieving increased conservation and sustainable use of coastal resources by simultaneously focusing on:

1. **Field support** to key countries including activities to catalyze integrated coastal management (ICM) programs in USAID countries and regions where there is interest in and need for ICM, promoting interaction and learning among USAID-supported ICM programs in the same region, and implementing substantive ICM field programs in Indonesia, Kenya, Mexico and Tanzania.

With support from USAID field missions, CRM II works with key in-country partners to implement sustainable field programs. While each field program has been designed to assist the missions to achieve their specific strategic objective, they reflect CRM II's approach.

CRM II also facilitates cross-region activities to promote increased capacity and learning.

2. **Global technical leadership** through substantive participation in global initiatives, building strategic partnerships with other donors and organizations which share CRM II's objectives and values, the development and dissemination of ICM concepts and tools, and global capacity-building efforts. Use of communications networks to share lessons learned in ICM substantially expands the impact of CRM II results far beyond the borders of key countries.

# CRM II at a Glance

**Life-of-Project Funding: \$20.2 million**  
**Project Duration: FY 1995-2003**

*CRM II Program Manager:*

University of Rhode Island  
Coastal Resources Center  
Project Leader: Lynne Hale  
Associate Director  
Coastal Resources Center  
Narragansett Bay Campus  
Narragansett, RI 02882 USA
