

Indonesia Experience: REDD+ Capacity Building

Muhammad Farid

Secretary of LULUCF Working Group

National Council on Climate Change

Outline

- Update REDD+ capacity program
- National Guidance for Sub national implementation
- Follow up needed
- Linking with REDD+ competencies Framework

Background

- There are 77 demonstration activities in Indonesia (by NGO, Private Sector, MoF supported by FCPF, UNREDD and other bilateral approach)
- NCCC in collaboration with JICA for BOCM/JCM
- Robust Modality for capacity building program: setting driver of deforestation, REDD+ national strategy (including National Action Plan of REDD+), national Forest Monitoring System (i.e FRIS)
- Need comprehensive REDD+ capacity program (focus on MRV and safeguard)
- Lack of providing strong recommendation

National Technical Guidance

- Developed by REDD+ agency/Satgas REDD+
- Mostly on Safeguard
- Need much guidance based on REDD+ Provincial action plan (7 Provinces done)

Linking to Capacity Building Framework

- Respect to National circumstances, national legislation and sovereignty
- Exploring country needed (can we develop detail curriculum, or just main area)
- Exploring on skill and knowledge of REDD+ financing

Follow up Needed

- In depth Assessment/analysis of 77 DAs to provide strong recommendation for New REDD+ agency
- Adding more area covered on national technical guidance and Public review
- Capacity building program based on need assessment and national document

Thank you

- Organization for supporting REDD+ capacity building program in Indonesia
